

General Arts and Science- One-year

Program Learning Outcomes

Learning outcomes represent culminating demonstrations of learning and achievement. In addition, learning outcomes are interrelated and cannot be viewed in isolation of one another. As such, they should be viewed as a comprehensive whole. They describe performances that demonstrate that significant integrated learning by graduates of the program has been achieved.

The graduate has reliably demonstrated the ability to

1. develop, through general knowledge gained in a wide range of subjects, insight into both self and society.
2. develop flexibility and clarity of both thought and expression in order to develop communications competence to a level required by business and industry.
3. understand and utilize critical thinking processes and problem solving techniques.
4. examine and evaluate various aspects of our changing society to assist in developing a sense of personal and social responsibility as a citizen in society.
5. employ basic vocational skills drawn from the areas of the Humanities, Social and Behavioural Sciences of Vocational Studies (Business, Technology).
