

PN to BScN Bridging Honours Bachelor of Science- Nursing

Program Learning Outcomes

Learning outcomes represent culminating demonstrations of learning and achievement. In addition, learning outcomes are interrelated and cannot be viewed in isolation of one another. As such, they should be viewed as a comprehensive whole. They describe performances that demonstrate that significant integrated learning by graduates of the program has been achieved.

The graduate has reliably demonstrated the ability to

1. Apply the concept of caring to practice professionally within legislative and ethical parameters.
2. Develop and sustain therapeutic relationships and/or partnerships with clients (individuals, families, communities, and populations).
3. Co-create health and well-being with complex clients.
4. Use the nursing process to safely and competently facilitate clients in identifying, planning for and achieving their health goals through the perspectives of health promotion, health protection, health maintenance and health restoration.
5. Communicate effectively and participate actively in the health care team.
6. Use critical thinking skills to apply relevant principles and theories in nursing practice.
7. Practice evidence-based nursing by applying and assisting others to apply appropriate research results.
8. Purposefully engage in the process of change to support the application of nursing leadership.
